

EUROVAC I - INDUSTRIAL PORTABLE

Eliminate sanding & grinding dust and cover your housekeeping needs with a Eurovac I - Industrial Portable Vacuum System

Powerful Regenerative Blower

Ideal for three to six technicians orbital sanding at the same time or two to three technicians using grinders or housekeeping housekeeping at the same time.

Long lasting - Low Maintenance

The regenerative blower has a T.E.F.C. Induction motor rated for 20,000 hours, which outlasts brush motors found in most portables. Regenerative motors require little or no maintenance.

Superior Filtration

Cyclonic filtration removes 99% of dust before the secondary filter. This results in the unit operating much more efficiently than units which do not have cyclonic filtration. The remaining 1% of dust is removed by a secondary cartridge filter which cleaned by compressed air pulse jet cleaning action.

HEPA Filtration

HEPA filtration is available by adding a filter between the pump and the cartridge filters. HEPA filters remove any remaining particles to 99.97% at .3 microns or larger.

Applications:

- **Source Capture Sanding** (woodworking, composite, drywall and solid surface)
- **Housekeeping**

Technical Data:

Model Number	30-125	30-134
Horse Power	5	10
Max. Airflow (CFM/m ³ h)	212/360	340/578
Max. Vacuum Inches WC	108	124
Filter Area (ft ² / m ²)	(30/2.79)	(30/2.79)
Degree of separation	99.93% at 3 micron	99.93% at 3 micron
Collection capacity (gal / in ³)	20/4838	20/4838
Sound Level	78 dB(A)	79 dB(A)
Hepa Filtration	Optional	Optional
Reverse Pulse	Standard	Standard
